2012 NATALIE'S WISH CELEBRATION

SATURDAY, APRIL 21

Balboa Bay Club and Resort, Newport Beach, California

Natalie's wish, the one she so innocently made on the eve of her twelfth birthday –
to have my disease go away forever –
has understandably been adopted by all of those
across the globe with cystinosis.

*T*oday, the cystinosis story is one of extraordinary hope and it is filled with legions of heroes starting with those who live with this insidious and unrelenting disease. The everyday lives of cystinosis patients demand enormous, even herculean efforts. But the word "hero" applies no less so to the families and friends who bravely support those with cystinosis in their daily lives. So too, the generous friends and donors who give their time, talent and treasure to make critically needed research possible. There are also the unsung heroes in the science and research community who have committed their careers to finding medical advances so essential to cystinosis patients.

Much has already been achieved but there is still much to be done as we recommit ourselves to the task of finding a cure. We need your help more than ever as we grow closer to making Natalie's wish a reality, and indeed a miracle-come-true for everyone who is affected by cystinosis.

Please join us on Saturday, April 21 for the 2012 Natalie's Wish Celebration.
